PROJECT EXPERIENCE

LegalXLK : Legal Case Management System For Lawyers Group Project (2025) Java, Springboot, Firebase, React

LegalXlk.com provides real-time government gazette updates, task and calendar management, access to legal acts, an AI-powered legal assistant, and secure document storage. The platform enhances legal workflows with AI-driven insights and cloud-based document management.

Created the gazette update page using React and the login, signup, reset password backend using springboot with sendgrid email verification and stored the user data into the firebase database.

Figma UI/UX Project (2025)

Designed a user friendly high-fidelity prototype for the SDG Goal "Zero Hunger" initiative, focusing on creating a platform that connects food donors with recipients to combat food insecurity while integrating with the Uber Eats app.

Plane management System (2024) Java

Developed a Java-based Plane Management System for managing seat reservations, allowing users to buy, cancel, and search for seats with real-time seating plans.

Climate action website - Group Project (2024)

Html, CSS, Javascript

Developed a dynamic webpage using HTML, CSS, and JavaScript, featuring an interactive image gallery with seamless navigation. Implemented an SVG-based sitemap for visual site structure representation.

Real time ticket booking system (2024)

Springboot, Angular, Java

Developed a real-time ticket booking system using Spring Boot (OOP concepts) and Angular. Implemented multithreading for concurrent ticket purchases and real-time ticket additions by vendors, ensuring seamless and efficient booking.

University Progression Outcome Predictor (2023)

Python

Designed and implemented a Python program to accurately predict progression outcomes, enhancing academic planning efficiency.
