ABOUT

Motivated and adaptable Computer Science undergraduate at IIT Sri Lanka with professional software engineering experience at IFS Sri Lanka. Experienced in Java, Spring Boot, RESTful APIs, React, PostgreSQL, and full stack application development, with hands on experience building and deploying real world software solutions. Currently expanding my expertise in iOS development, modern backend technologies, and DevOps practices. A continuous learner with a strong passion for emerging technologies, problem solving, and developing practical, scalable software solutions.

EXPERIENCE

IFS

Software Engineer Intern

Colombo, Sri Lanka

01/07/2025 - 01/07/2026

- Developed and maintained backend workflow features using Java, PL/SQL, and Camunda workflow engine within IFS Cloud.
- Conducted smoke regression and feature testing for workflow functionalities across multiple environments.
- Investigated and resolved backend issues related to workflow execution, authentication, and permissions.
- Enhanced workflow REST task by improving API response handling, increasing error visibility for users.
- Integrated TechDocs into workflow designer, allowing access to version specific documentation directly from the IFS application.
- Increased code quality reporting by integrating JaCoCo coverage into SonarQube for CI/CD pipelines.
- Researched Camunda Version upgrades and migrated from JavaScript engine Nashorn to GraalVM, validating through extensive testing.
- Facilitated Agile sprint ceremonies as interim Scrum Master, guiding sprint planning, daily stand ups, and retrospectives while managing deliverables via Jira and Bitbucket.
- Utilized version control systems like Git and Bitbucket to manage source code changes during development cycles.
- Participated in code reviews to ensure adherence to best practices and standards.

EDUCATION

(2023 - Present)

**University of Westminster, UK
IIT**

Bsc (Hons) Computer Science

Level 4 Modules

- Mathematics for Computing
- Computer Systems Fundamental
- Software Development I
- Software Development II
- Trends in Computer Science
- Web Design and Development

Level 5 Modules

- Object Oriented Programming
- Database Systems
- Software Development Group Project
- Data structures and Algorithms
- Client Server Architecture
- Human Computer Interaction

(2010 - 2023)

Royal College, Colombo 07

- G.C.E Ordinary level (2019)
 - G.C.E Advanced level (2023)
-

SKILLS

Technical skills

- **Languages:** Java, Python, Swift, PL/SQL
- **Backend & Web:** Spring Boot, REST APIs, React, Camunda Workflows
- **Databases:** PostgreSQL, MySQL, Firebase
- **DevOps, Cloud & Tools:** Docker, Linux, GCP, Git, Railway, Vercel

Soft skills

- Problem solving
- Team work
- Adaptability
- Leadership
- Communication

CERTIFICATES

- React Essential Learning
 - Java Object Oriented Programming
 - Google Cloud Platform Essential Training for Developers
 - Git Essential Training
 - MySQL Essential Training
-

PROJECT EXPERIENCE

Kayaa Cafe: Full Stack Online Food Ordering Platform (2026)

Java, Spring Boot, React, PostgreSQL, JWT, Google OAuth, Gmail API, PayHere, Railway, Vercel

Developed a full stack café ordering platform enabling customers to browse menus, manage carts, place orders, and complete secure online payments. Implemented JWT authentication, Google OAuth login, OTP based email verification, and automated email notifications. Built an administrator dashboard for managing menu items, categories, customer orders, and order status updates. Designed RESTful APIs using Spring Boot and PostgreSQL with a responsive React frontend, deployed using Railway and Vercel.

(<https://www.kayaacafe.lk/>)

Airline Booking & Online Check-in System (2026)

Java, Spring Boot, PostgreSQL, Spring Security, JWT, QR Code, JavaMail 2026

Developed the backend for an airline reservation and online check-in system supporting flight booking, passenger check in, reservation management, and digital boarding pass generation. Implemented secure authentication and role based access control using Spring Security and JWT. Designed RESTful APIs with Spring Boot and PostgreSQL for managing bookings, passenger details, check in workflows, and ticket information. Integrated QR code generation for boarding passes and automated email notifications for booking confirmations, OTP verification, and password recovery.

LegalXLK : Legal Case Management System For Lawyers Group Project (2025)

Java, Springboot, Firebase, React

<https://legal-x-lk.vercel.app/> provides real-time government gazette updates, task and calendar management, access to legal acts, an AI-powered legal assistant, and secure document storage. The platform enhances legal workflows with AI-driven insights and cloud-based document management. Created the gazette update page using React and the login, signup, reset password backend using springboot with sendgrid email verification and stored the user data into the firebase database.

Figma UI/UX Project (2025)

Designed a user friendly high-fidelity prototype for the SDG Goal "Zero Hunger" initiative, focusing on creating a platform that connects food donors with recipients to combat food insecurity while integrating with the Uber Eats app.

Real time ticket booking system (2024)

Springboot, Angular, Java

Developed a real-time ticket booking system using Spring Boot (OOP concepts) and Angular. Implemented multithreading for concurrent ticket purchases and real-time ticket additions by vendors, ensuring seamless and efficient booking.(<https://github.com/UthpalaWijesundara/Real-time-ticket-booking-system>)

ACHIEVEMENTS

Top Board Member of Royal College photography society

Focus 2021 : All island Photography Competition 3rd place in Inner School Monochrome category

Member of Royal College Squash Team

- SLSSA Interschool Squash Championship 2015
- Annual Interhouse Squash Tournament 1st place 2016
- SLS 28th Junior National Championship runner up 2018

IWMS Examinations - Senior Certificate (2019)

AAC Engineering Academy completion of Aviation course (2016)
